# EcoLogic

## Making sustainability an easy choice

We want to make it as easy as possible for our customers to make sustainable choices across all bathroom categories. This requires us to rethink our production processes and reduce the ecological impact of our products over their entire lifespan.

That is why we developed EcoLogic – a new approach to product development that focuses on four values, allowing us to integrate sustainability in our manufacturing processes and our finished products.

Featuring a natural stone textured finish, the Ultra Flat S shower trays add a subtle, yet distinctive look to your bathroom. Their ultra-slim profile, minimalist look, modern colour palette and strong sustainability credentials make them the perfect choice for any space.

**Eco-friendly materials**  
Our shower trays are made from IdealSolid®+, an innovative and more eco-friendly material that combines crushed dolomite rock and resin made from 30% recycled PET plastics.

**Green manufacturing**  
The shower trays are manufactured with 100% green energy coming from renewable sources.

**Less material, less impact**  
A special double-mould process allows us to use less material for the production of our trays while still ensuring stability and strength, causing less environmental impacts.\*

**Sustainable packaging**  
Our packaging is 100% free from plastic and instead uses recyclable and more sustainable materials.

**Recyclable**  
At the end of their life, our shower trays can be taken to local recycling depots and the recycled material can be reused in road construction or the production of building materials.

**Antibacterial**  
The trays' surface features antibacterial properties, making them more hygienic and offering a built-in protection against harmful bacteria.

\*Only used in the production of our UltraFlat S+ trays.

### Sustainable Value Chains

Redefining the manufacturing process to drive renewable and sustainable transformation processes and transportation.

### Elevated Hygiene

Promoting health and wellbeing by maximising hygiene and sanitation performance.

### Sustainable & Durable Materials

Reimagining material design and maximising efficiency, durability and recyclability.

### Energy & Water Efficiency

Optimising energy and water efficiency through design and quality.

UltraFlat S<sup>+</sup> | S i.life

## Benefits

### Ultra-slim

At only 30 mm in thickness, our UltraFlat S shower trays can be fitted on top or flush with a tiled floor, giving your bathroom the seamless look of a wet room. The reduced thickness also makes it easier to enter and leave the shower, even for people with limited mobility.

### Antibacterial

The trays have anti-bacterial properties which make them more resistant to the growth of bacteria and provide better hygiene.

### Durable

The combination of dolomite rock and elastic resin makes our IdealSolid®+ material extremely durable and impact-resistant. The innovative technology ensures that our trays look stylish and smart over many years. In the event of scratches or small cracks the trays can be easily repaired (repair kit to be purchased separately).

UltraFlat S<sup>+</sup> | S i.life

## Benefits

### Stone texture

The characteristic stone texture surface of the trays creates a comfortable and naturally warm underfoot experience. The surface of our trays is also slip-resistant so you can relax and enjoy your shower.

### Cuttable

The trays can be easily cut to size on site to fit your specific space or any awkward room features.

### Sound absorbent

The high particle density of our IdealSolid®+ material creates a sound-absorbing effect, reducing the noise from water hitting the shower tray and improving living comfort.

# UltraFlat S<sup>+</sup> | S i.life

Our UltraFlat S shower trays are crafted with precision and attention to detail. They have been rigorously tested to meet the highest industry standards and quality requirements while minimising environmental impact.

## Certifications and warranty

### EN ISO 4892-2

#### RESISTANT TO LIGHT

Shower trays do not discolour and wear through long-term change in lighting. They are tested with xenon lamps, which accelerate the environmental effects to which the shower floors are exposed in daily use (EN ISO 4892).

### ISO 22196

#### ANTIBACTERIAL

The surface of our shower trays complies with ISO 22196:2011 international antibacterial activity standard.

### EN14527

#### DETERGENT RESISTANT

Shower trays are subjected to strict inspections of resistance to chemicals and pass these tests according to standard EN 14527.

### EN16165

#### SLIP RESISTANT

With safety in mind, we have applied a market leading treatment on the surface of our shower trays to guarantee more grip (class C – slip resistance 24°).

**5** Years of  
warranty  
on all shower trays

S+

## UltraFlat S+

### A touch of class

The collection's ultra-flat, rimless design fits harmoniously in every bathroom, creating a unique and luxurious look. UltraFlat S+ is the perfect choice for adding a touch of elegance and sophistication to your space.

# Features

## S<sup>+</sup>

**Rimless design**  
The trays have no visible rim, giving them a minimalist and ultra-sleek look. A subtle slope ensures the water runs to the drain hole.

**Greater design freedom**  
UltraFlat S<sup>+</sup> trays can be safely trimmed on all four sides to fit different room sizes and features.

**Tray height/thickness**  
30 mm tray thickness for a discreet and inclusive design.

**Modern waste cover**  
The design waste cover is available in classic stainless steel as well as four additional finishes that match the colours of the trays, adding a flawless finishing touch to your shower area.

UltraFlat S<sup>+</sup>

# UltraFlat S i.life

## Modern and minimalist

With a contemporary, slim design and a fully integrated waste, the UltraFlat S i.life shower trays are the perfect finishing touch to a space, offering a cohesive design feel with a modern look. The trays are packed with practical features that allow you to relax and enjoy the perfect shower experience.

# Features

## S i.life

**Cuttable**  
The UltraFlat S i.life trays can be easily cut on the side opposite to the waste without impairing the beauty of the design.

**Tray height/thickness**  
30 mm tray thickness for a discreet and inclusive design.

**Discreet integrated waste cover**  
The fully integrated waste adds a subtle but stylish detail to the tray design.

**Subtle rim**  
The low rim ensures no distraction from the sophisticated design but helps to clearly differentiate the shower area from the rest of the bathroom.
